F_Bl (MS(Bl)/MSE) = 21.531

Source of variation	Degree of freedom	Sum of square	Mean square	F
Treatments	a-1 = 3	SS(Tr) = 110.91667	MS(Tr) = 36.97222	11.779
Blocks	b-1 = 2	SS(Tr) = 135.16667	MS(Tr) = 67.58334	21.531
Error	(a-1)(b-1) = 6	SSE = 18.83333	MSE = 3.13889	
----------	----------	----------	----------	----------
Total	ab-1 = 11	SST = 264.91667		

Treatments Testing
Testing α1≠α2≠α3≠α4≠# the alternative Hypothesis to test with null α1=α2=α3=α4==
The null α1=α2=α3=α4== must be rejected if F>9.7795

Calculations

F(Tr) = 11.779

Decision

Null α1=α2=α3=α4== must be Rejected at level of significance 0.01 and Accept α1≠α2≠α3≠α4≠≠

Blocks Testing
Testing β1≠β2≠β3≠≠ the alternative Hypothesis to test with null β1=β2=β3==
The null β1=β2=β3== must be rejected if F>10.9248

Calculations

F(Bl) = 21.531

Decision

Null β1=β2=β3== must be Rejected at level of significance 0.01 and Accept β1≠β2≠β3≠≠

Process finished with exit code 0
